AN AFFORDABLE WAY OF SECURING YOUR IT SYSTEMS

Relying on luck when it comes to your IT?

How would your business cope if you lost internet connection? Or if your entire system went down? What if you lost important business documents or client data?

Network and server problems can affect you and your business in a number of ways, including:

- Losing time and customers due to server downtime
- Rising costs of trying to fix issues
- Increasing risk of virus attacks and hackers

...all piling more pressure on internal resources that you can't afford.

We take these worries away from you, giving you peace of mind and leaving you free to grow your business.

THE SOLUTION

"For less than the price of a cup of coffee a day, we'll look after your IT, ensuring your business systems are running as they should."

Managed Networks finds small problems before they become huge calamities – saving your hours of downtime and frustration.

DAILY SAFETY CHECK	DAILY HEALTH CHECK
Daily automated scan	Comprehensive inspection of systems
Verifies status of back-up and antivirus	Provides detailed picture of your IT
Gives you peace of mind	Saves hours of downtime and frustration

SERVER & NETWORK MONITORING	SERVER & NETWORK MANAGEMENT
24/7 checks on all connections & systems	Fully outsourced service
Delivers information quickly on any issues	Gives constant support and advice
Enables fixes to be made fast	Affordable costs with no surprises

You can either go for a complete solution that combines all four services to provide maximum protection and minimum downtime - or take a step at a time and build up your level of service.

Why is it so effective?

- Affordable per-user monthly pricing, with no start-up costs
- No infrastructure to buy or maintain
- Super-fast to set up and very easy to use
- Automated service, freeing up your time
- Tailor made for small and medium-size businesses

What can you expect from each service?

Service	What it does	Benefits
Daily Safety Check	Automated daily scan of your most critical systems Checks back-up status Verifies your antivirus	Provides an added layer of protection to your critical systems Enhances your security Gives you peace of mind
Daily Health Check	Automated daily, detailed scan of your networks and servers Checks a more comprehensive list of applications Provides a detailed report, delivered to you whenever, wherever you need it	Gives you more comprehensive information about your systems' performance Less downtime Takes away the worry of things going wrong
Server & Network Monitoring	Checks all network and internet connections, 24/7 Delivers information quickly about any errors Highlights what areas need fixing	Provides faster, more extensive fixes – even the smallest of issues are flagged Sorts a comprehensive range of issues early before any damage is done Truly maximises the performance of your systems
Server & Network Management	Fully outsourced service 24/7 monitoring Comprehensive help desk and support service Builds on the first three service areas to give you complete systems management	Predictable monthly costs with no surprises Frees up internal resources Provides maximum security protection Minimises downtime
